Motorisation for sliding and swinging gates

HOME
MOTION BY

somfy®

All the advantages of motorisation for you!

Somfy can automate your gate and get it moving with various types of motorisation systems.

Comfort is what you want

Move freely on foot, on your bicycle or in the car, with Somfy motors, automatic systems and controls. Close your gate with a single click on your remote control, whenever you feel like it!

Security is what you need!

Opened when required and closed immediately afterwards, your gate must operate faultlessly. Your peace of mind, and that of your family and friends is at stake. By automating the opening and closing of your gate, Somfy systems make it possible to live in a home that is both easy to access and perfectly secure.

Guarantees peace of mind!

All Somfy motorisation units comply with European safety standards.

Calling upon the network of Somfy professionals is your guarantee of a quality installation.

To find out more, consult your installer or go to www.somfy.com.au

Gates are great! But motorised gates are greater!

A click on the remote control and your gate opens in a few seconds: it's easy and it's quick! No need to leave your vehicle to open it.

When it's locked in closed position, it cannot be opened when it shouldn't be.

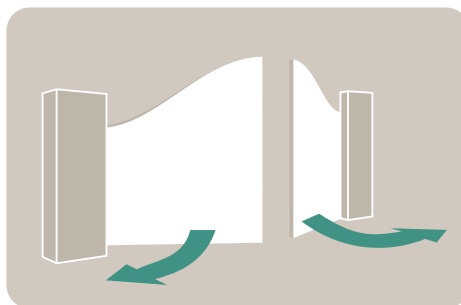

When it's open, it closes again safely by detecting any fixed or moving obstacles.

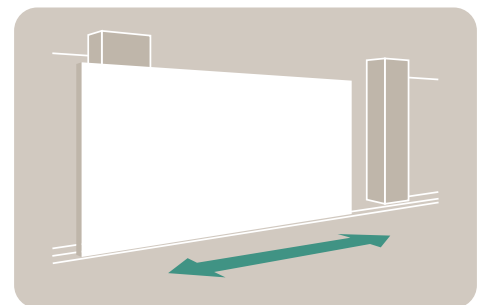

Power cut! You can either operate your gate manually or not change anything! The optional emergency battery lets it continue to function normally.

Sliding or swinging?

There's a special motor for each type of gate.

For swinging gates, the motors work independently on each panel.

For sliding gates, the motor drives the gate along a notched rail.

Radio Technology Somfy®

Radio Technology Somfy®

- Radio control system **exclusive** to Somfy.
- **RTS evolves** with your clients as their needs change. You can start with one (the gate for example) and add new automated systems without having to change the existing system.
- Radio Technology Somfy is **pirate proof** and interference free.

Why choose Elixo 500 RTS motorisation or Ixengo S or L for your gate?

+ Freedom of movement regained

- A single remote to control all automatic features in the home.
- Radio Technology Somfy®.

+ Comfortable to use every day

- Opens quickly:
Elixo 500 RTS: 15s (for a 3m gate).
Ixengo RTS: 20s to 90° (24V version).
- Integrated automatic gate closing.
- Partial opening for pedestrians or cyclists.

+ Safety guaranteed

- Automatic obstacle detection.
- Emergency battery in the event of a power cut (optional).
- 5-year guarantee.
- Can be unlocked by hand using a key.

For customised comfort and safety

POCKET REMOTE CONTROLS

Keygo RTS

To control up to 4 pieces of motorised equipment, eg. gate, lighting, roller shutters.

Keytis 2 RTS

To control 2 pieces of motorised equipment for example your gate and your lights.

HOME REMOTE CONTROL

Telis 4 RTS

To open the gate with the home remote control.
1 + 4 channel radio remote control to control several motorised pieces of equipment together or separately: patio awning, outdoor lighting, roller shutters, etc.

COMFORT

Backup battery

To open your gate even in the event of power cut.

SAFETY

Photoelectric cells

To detect the presence of an object or person in the opening/closing zone and stop the motor at once.

RTS Radio Keypad

To open your gate from outside with protected access.

Electrical lock

To make your gate even more secure.
(Ixengo S RTS and Ixengo L RTS only)

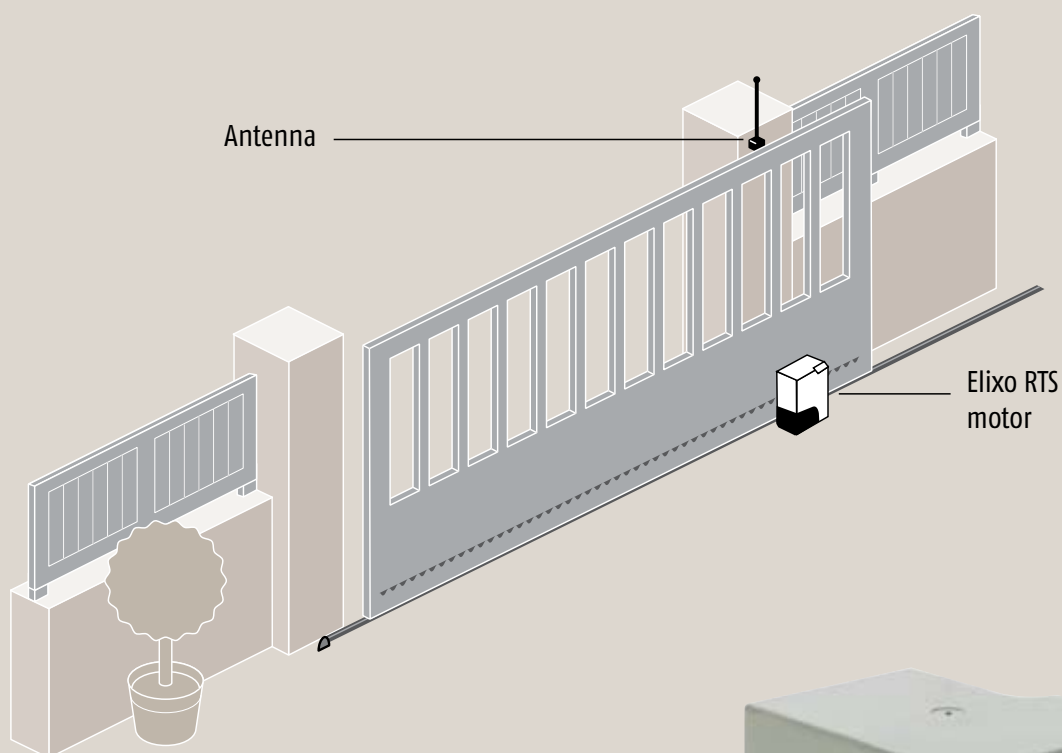

Elixo 500 RTS

MOTORISATION FOR SLIDING GATES

With Elixo 500 RTS, your installer can motorise your sliding gate whether it be made of wood, metal or PVC, up to 8 m long and 500 kg in weight.

It's high efficiency and proven reliability mean that your gate will open in 15 seconds in complete safety, thanks to the automatic obstacle detection system that immediately stops the motor.

Elixo 500 RTS also lets you protect your property, because once your gate is closed, it is locked and will withstand any attempt to force it open.

Elixo 500 RTS motor

Ixengo S RTS & Ixengo L RTS

JACK MOTORISATION
FOR SWINGING GATES

The Ixengo range offers 2 power versions for the motorisation of swinging gates made of wood, PVC or metal. Your installer will advise you which is the best for your project according to size, weight and any other fitting requirements. Ixengo S RTS and Ixengo L RTS motorisation systems can be fitted to new buildings as well as to restored ones.

- Ixengo S RTS up to 1.8m and 250kg per panel.

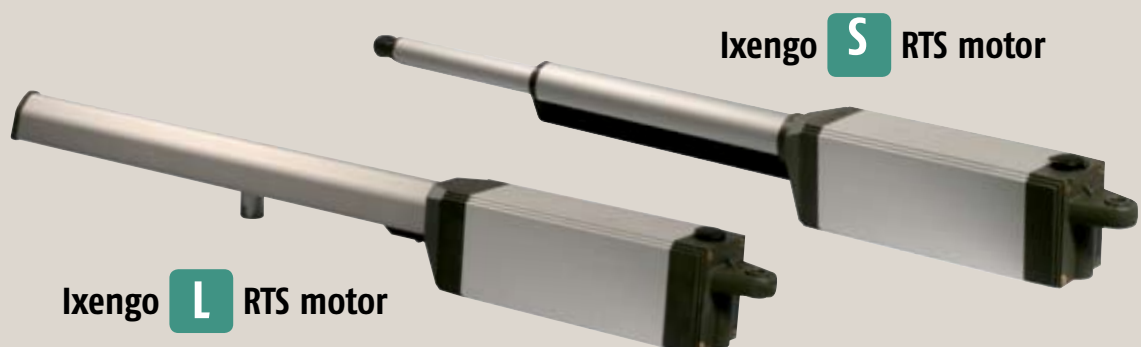

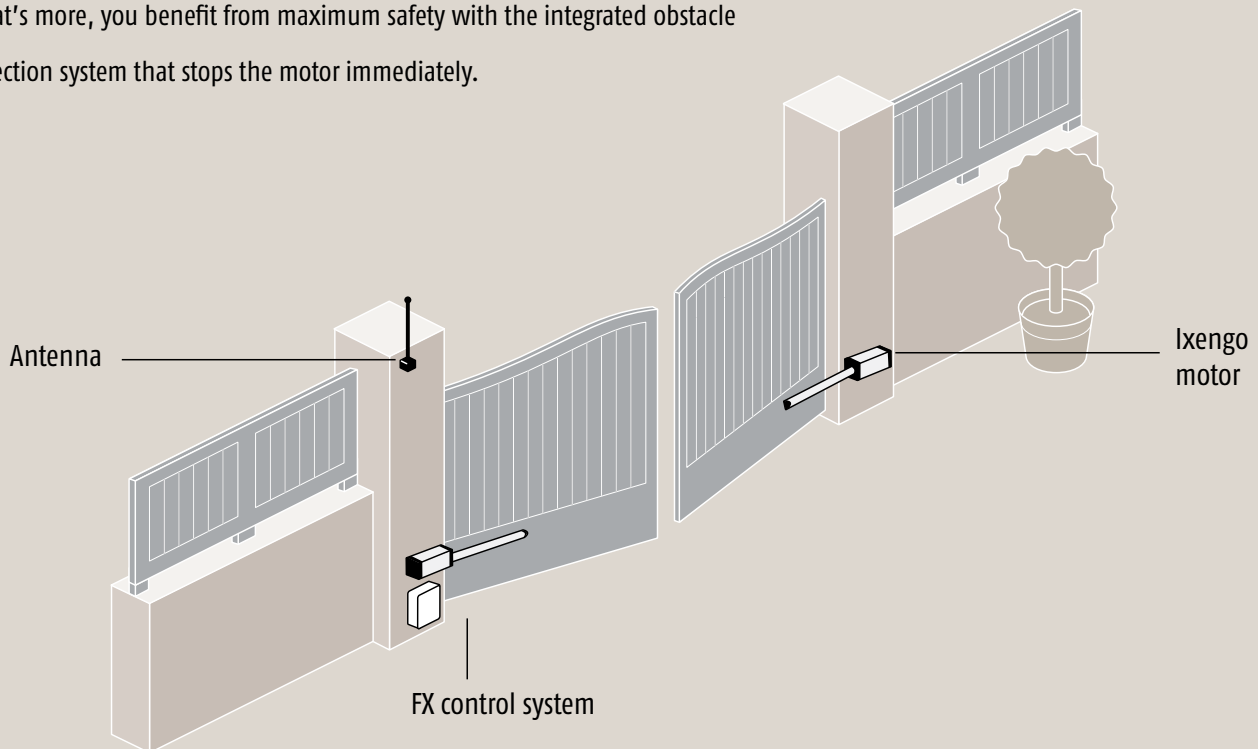

Quick opening: 20 seconds to 90° (24V).

- Ixengo L RTS up to 4m and 400kg per panel.

Quick opening: 20 seconds to 90° (24V).

Ixengo motor technology lets your installer determine the opening angles accurately.

What's more, you benefit from maximum safety with the integrated obstacle detection system that stops the motor immediately.
