

# Façade automation at your fingertips

# High performance façades with an intuitive solution

High performance façades with automated solar shading are widely used in large commercial projects. The comfort and energy savings from having solar shading in the right position at the right time are well understood.

animeo IB+ Touch Building Controller is a feature-packed Somfy solution dedicated to delivering the same performance benefits in a flexible solution for smaller buildings.

- Scalable solution using 4 or 8 zone controllers
- Ideal for individual tenants as multiple controllers may be used in a building
- Environmental sensors for internal or external solar shading
- Major alarm input retracts all blinds in an emergency
- Remote access using built in network port

## Market segments

**animeo IB+ Touch Building Controller is designed for a wide variety of building types.**

### › Offices

Offices with single or multiple tenants are ideally suited to the Touch Building Controller. Visual and thermal comfort are improved and the option to install an animeo system for each tenant within a building gives an increased level of control.

### › Education

The increased performance from access to views and natural light for students has been well proven. animeo IB+ Touch brings high performance facade control including password protection for all functions and settings.

### › Healthcare

Many studies have shown that patients with access to views recover at a faster rate. By automating solar shading it allows healthcare staff to focus on their patients' needs. Local switches and smart interfaces let patients have personal control of their blinds.

## End products

**animeo IB+ Touch Building Controller is optimised to control all types of motorised solar shading including:**

### › Interior Shadings

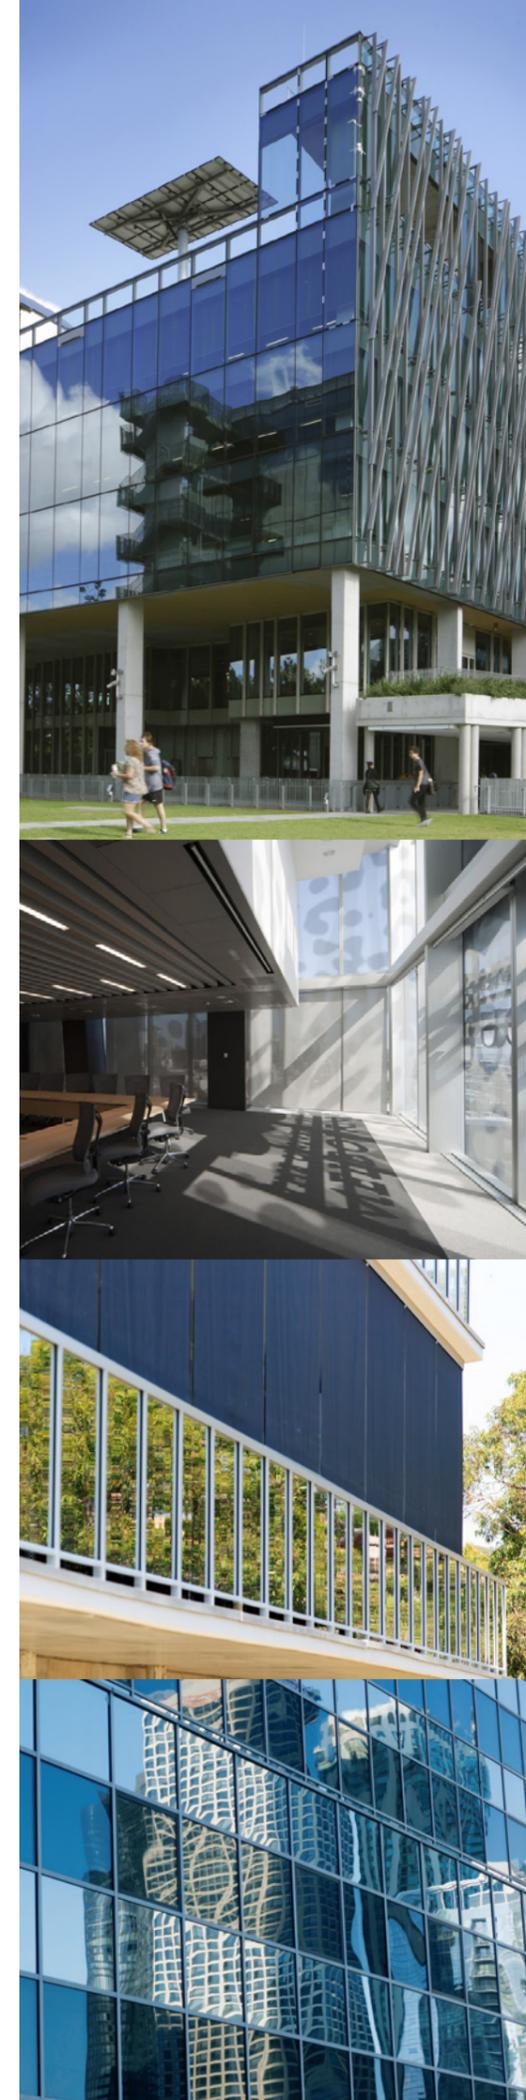

- Roller Blinds and Sunscreens
- Venetian Blinds
- Curtains

### › Exterior Shadings

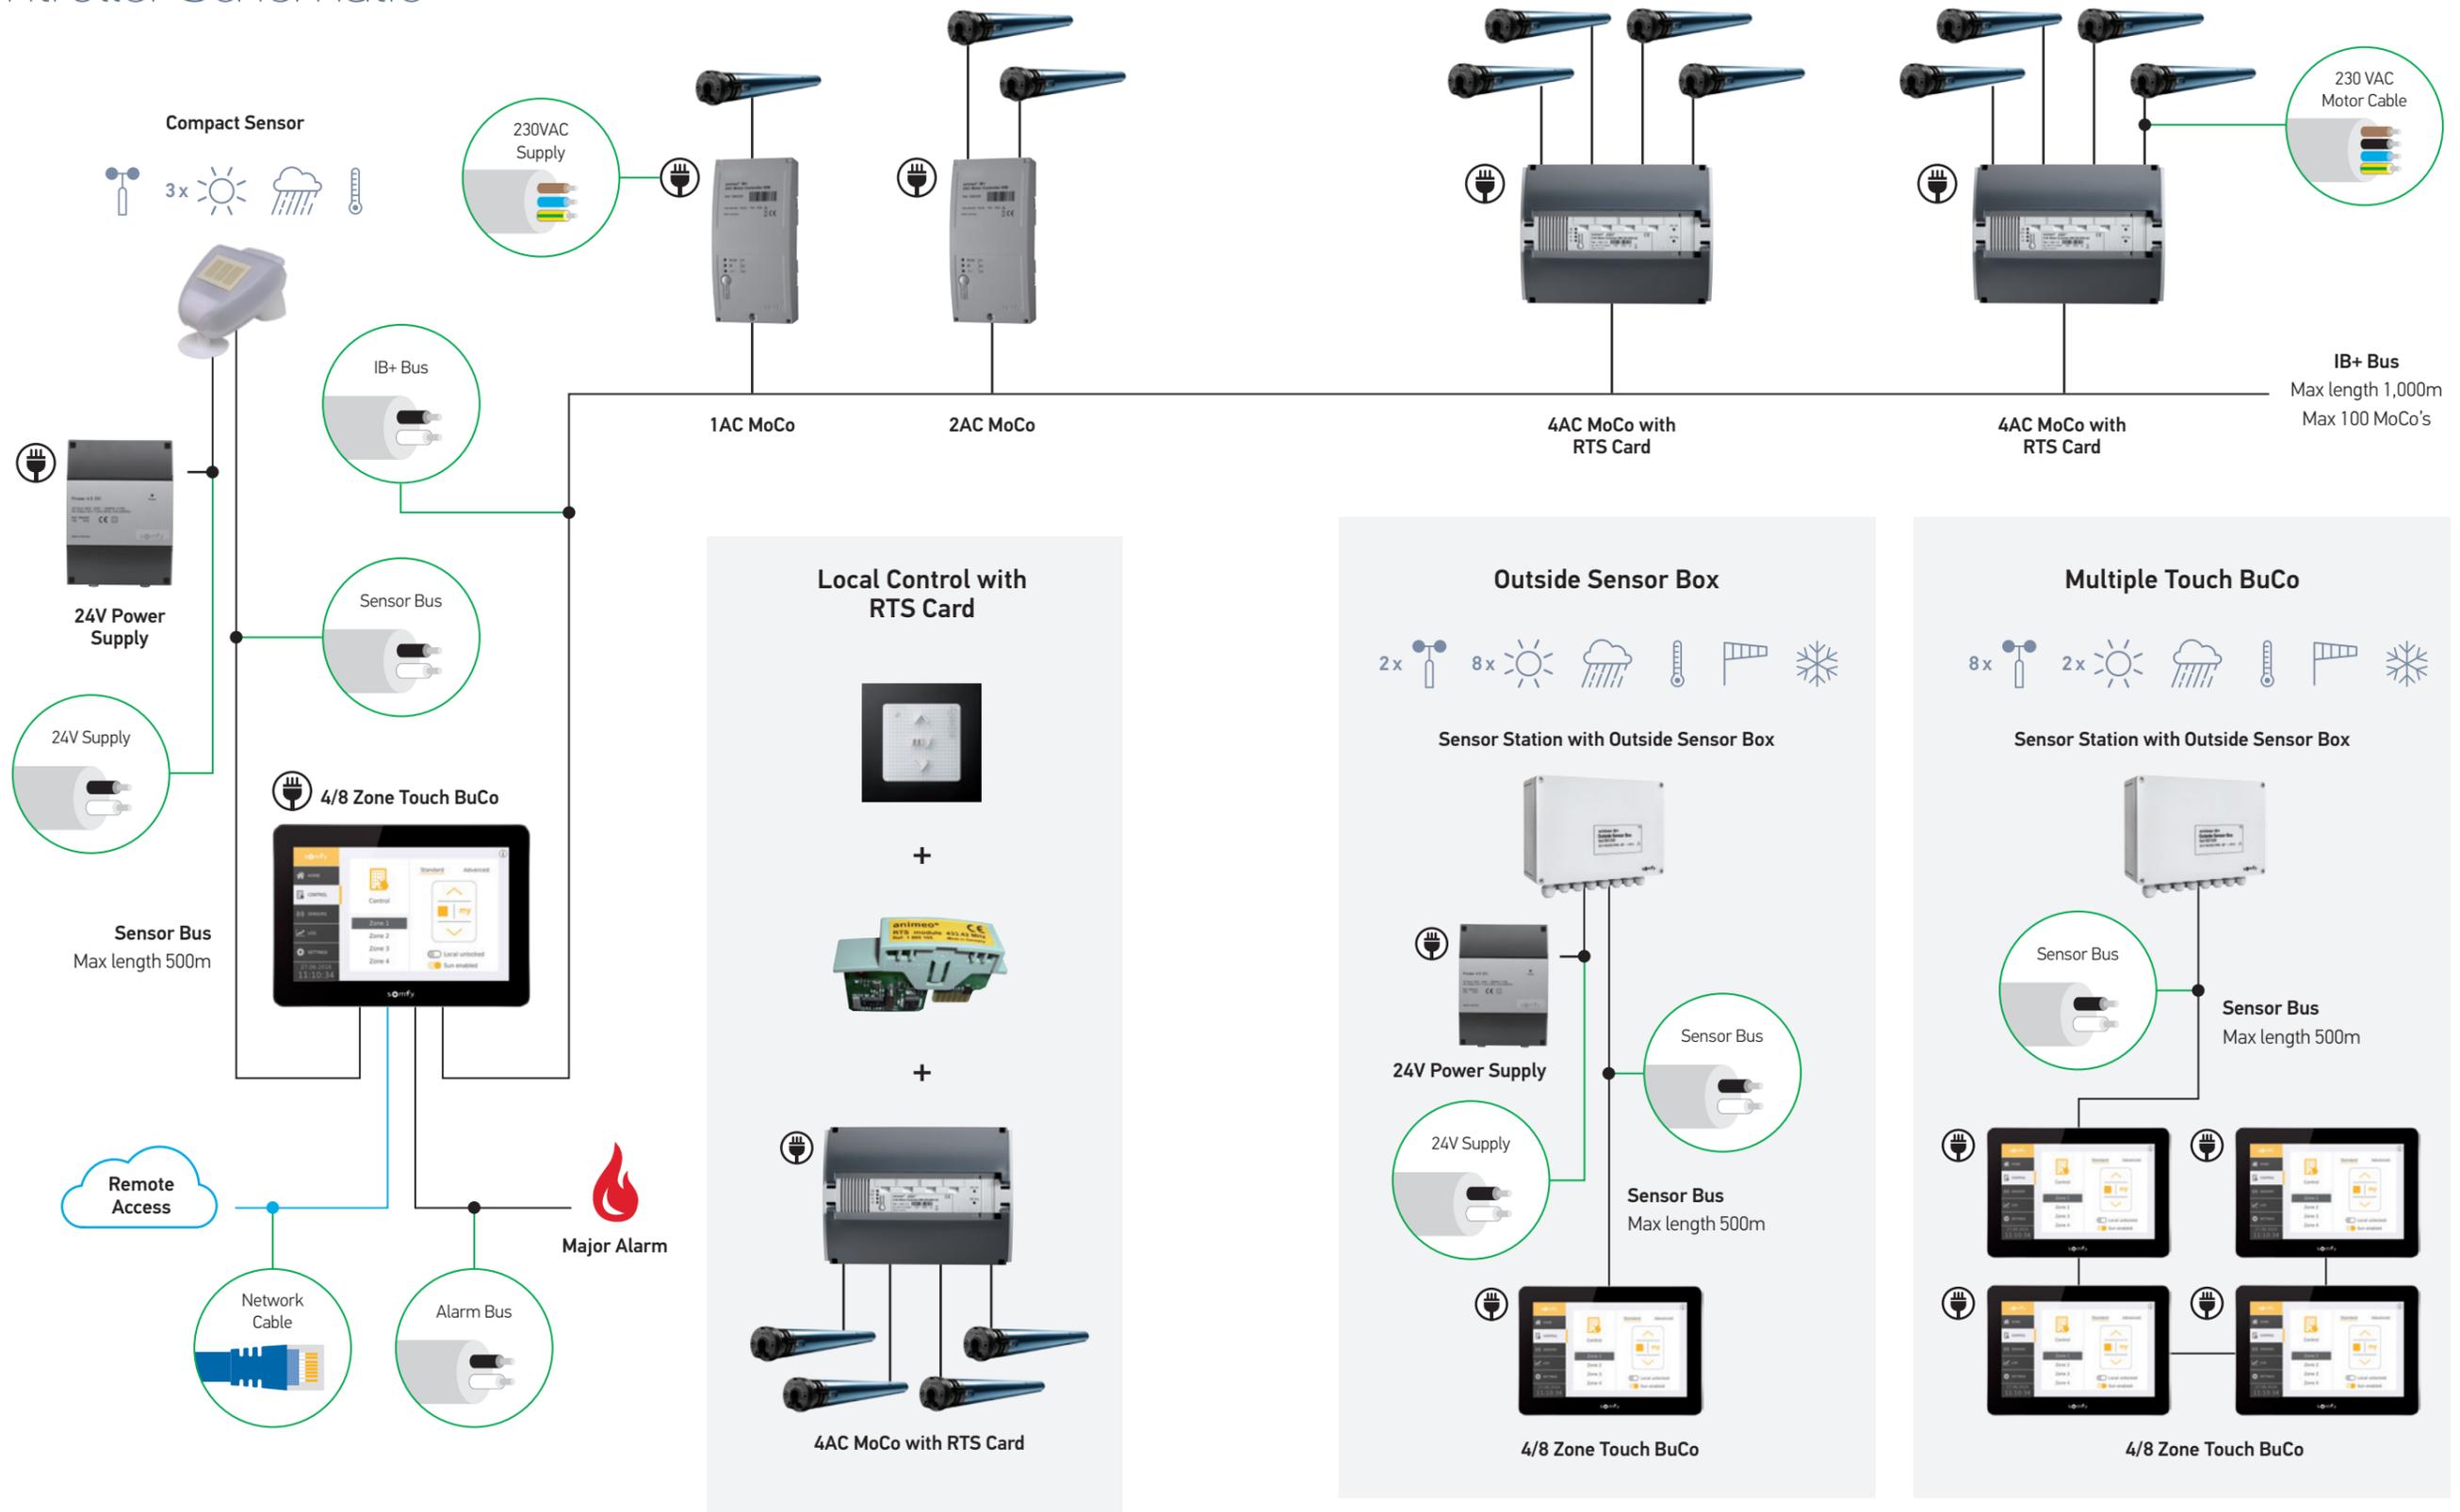

- Awnings
- Sunscreens
- External Venetian Blinds
- Horizontal and Vertical Louvres

### › Windows

- Inward and Outward Opening

# animeo IB+ 4/8 Zone Touch Building Controller Schematic

# Motor Controllers

The animeo IB+ Touch Building Controller has been specifically designed to work with the full range of Somfy motor controllers.

The 4AC Motor Controller can control 4 x 230VAC motors and is suitable for use with internal roller blinds and screens, curtains, internal and external venetian blinds and windows.

Local control is easily facilitated by the Somfy RTS Radio Receiver Card and Somfy RTS remote controls or RTS wall switches. Local switching is also possible using dry contact inputs allowing control from hard-wired wall switches or audio visual systems.

# Somfy Project Journey

## Specification

We can assist during the planning meeting to make your life just a little easier. Somfy's Project Development experts provide the support you need to meet the requirements of each project and make sure that the solution is correctly specified.

## Commissioning

Somfy offers a range of services depending on your project location and size. Our Projects and Services team, including Somfy Electrical Services, a specialist electrical contractor for solar shading installation, supports projects with electrical installation, project commissioning and project management.

## After-Sales Support

We offer one-off troubleshooting, visits to adjust and optimise settings and check functionality, and ongoing maintenance agreements in order to give the solution a long lifespan and continuously perform optimally.
